

Tooling Intelligence SupplyPad

SupplyPad offers all of the reporting capabilities of SupplyPro's industry-leading SupplyPort software in a handheld device. SupplyPad delivers mobile inventory management for materials wherever they are located at your facility, with optional wireless connectivity.

Suggested Applications:

Cutting Oil and Fluids • Vehicles • Ladders
Refrigerated Materials • Drums and Barrels
Forklifts • Wheels • Trucks • And many more!

Mobile
Inventory
Management

Specifications

- 205mm x 294mm x 25mm
- 264mm anti-glare touchscreen with auxiliary illuminated keypad
- 1024 x 768 XGA Resolution
- 1.1 kg hand-held unit weight
- Ultra Low Power Consumption - up to 8 hours of operation per charge
- Tested to 4 feet drop resistance

Features

- Rugged casing for harsh industrial environments
- Barcode scanner
- Power and network docking station
- Optional wireless connectivity as standard

Take SupplyPad on the go to bring control to multiple facility locations from one compact device. Attach the docking station to the desktop, work station or vehicle for up-to-date records from one location to the next. If your facility has a wireless network, the SupplyPad uploads transactions on the move. If a wireless network is not available, the device records all of the transactions and uploads them as soon as the device is returned to the docking station.

Barcode
scanner

Track the use of barcoded items with a quick scan.

Virtual
Inventory
Module

Supplypad is fully integrated with SupplyPro's VIM system to deliver even greater mobile control.
