## About SupplyPort:

SupplyPort's user-friendly software delivers intelligent inventory management to your supply chain from start to finish. SupplyPort, the virtual administration centre for our vending devices, collects and processes transaction data, controls inventory levels and manages automatic replenishment to put your inventory data to work like never before.

### Product Control:

- SupplyPort** - tracks the movement of inventory and assets (products) by anyone with access to the system (users). Control as much or as little as you want, at the vending machine or at the port.
- Product Types** - Define products as reusable, returnable, check-in/check-out or absolute control.
- Product Access Limits** - Restrict user access to products based on criteria specified in their access group and maintain strict control over high value, mission critical items. Lockdown items to prevent access.
- Product Kits** - Group two or more products to provide straight forward access for users requiring multiple items. Products within a kit can also be dispensed individually.
- Product Images** - Attach individual photos to each product in the database for easy recognition at the vending machine.
- SupplyPort Uploader** - Transfer large product, user and other data files to the port from spreadsheet data. Receive e-mail confirmation that your data additions and updates have been processed.
- Substitutes** - When an item is unavailable, guide users to an alternative or replacement product to prevent disruption to the workflow.
- FIFO** - Enable 'first in first out' dispensing to ensure the correct rotation and management of products at risk of expiration.
- Allocation Codes** - Company defined tracking codes can be used to assign product costs to specific departments, cost centres, job numbers etc. Allocation codes can also be used to gather information about how products are being used or to guide users through product selection.
- Lot Management** - Record the movement of batch numbered stock and assets with complete traceability.
- Serialisation and Calibration** - Take total control of your serialised and calibrated inventory.

Secure cloud data transfer

## Ordering and Reporting:

SupplyPort's automated ordering system provides fast, reliable and accurate decision making to your supply chain to prevent costly disruption to the workflow.

- Easy to integrate with external purchasing systems and distributor systems
- Individual product rules trigger orders and alerts
- Orders can be scheduled for regular automatic delivery or run on an ad-hoc basis, for example during increased production runs
- Orders are linked to product refills at the vending machine. SupplyPort's Rapid Refill function saves time at the vending machine during re-stock
- Limit access to order authorisations including hold for review, adjust, cancel-when-late and void
- Access complete order logs and authorisation history.

SupplyPort's extensive reporting capabilities provide information and insight across the supply chain, from order point to end user.

All product movements are logged and traced to each user's unique login. User logins can be synchronised with existing clock number or employee identities. Accountability promotes responsible consumption when all transactions are traceable.

- Schedule automated rolling reports
- Customisable report columns, filters and sorting
- Multi-format reports include XLS, XML and CSV
- Delivery options include e-mail and FTP
- Track inventory
- Identify trends
- Investigate discrepancies
- Explore system operation.

### Example Reports:

- Consumption by Device
- Trend by Product and User
- Current Inventory
- Calibration Due
- Stock Location
- User Contact Tracing
- Inventory Turnover Analysis
- Stockout Analysis

**Tooling Intelligence provides innovative inventory management solutions to organisations and industries across the United Kingdom and Europe.**

We are experienced in providing state-of-the-art inventory management technology to our customers. We were founded in 2006 by a team of engineering experts and business specialists, who had the vision to combine cutting-edge solutions with premium customer service. We work with partners across numerous sectors, including aerospace, medical, precision engineering, oil and gas and many more.

## Cutting-edge products

We have a broad range of products in our portfolio. Whether you are looking for a mobile inventory management solution for your on-the-go teams or a heavy-duty dispensing unit with complete visibility, you'll find something to suit your requirements with us.

**Browse our website to learn more about our products or contact our experienced team for more information.**

## Access ongoing support

We know that the journey doesn't end once the installation is complete. We pride ourselves on our level of service, making sure you receive the support you need throughout the process. Whether you want to expand your existing inventory management solution or need technical help, our service team are always on hand to assist you.

## Personalised service

We are an independent business, which means we always provide a high-quality, personalised service to our clients.

From the very start of your project, we work closely with you to find the right inventory management solution for your application. Our products are customisable too, which means we can help you design and create the ideal technology that meets your exact requirements.

## Visit our centre

We understand that the best way to appreciate our products is to see them in action. That's why we invite our customers to our specialist Demonstration Centre to see the full potential of the solution in person.

Here, you can browse the full SupplyPro product range, as well as our service and support tools. You will have the opportunity to meet our knowledgeable team too.
